Langley School District
District Educator: K-12 ADST
& Digital Literacies

WHAT WE ARE LEARNING: (OUR LEARNING INTENTIONS)

Overview of ADST K-12

1. Inspiration for the ADST curriculum
2. How the *Know, Can, Do* of the ADST curriculum evolves through the grade levels
3. The elements of *Design Thinking* & how *Maker* could fit into ADST
4. Important *conditions for learning: collaborative teams and formative assessment*

SUCCESS WILL LOOK LIKE:

- You will participate and engage in today's activities
- You will continue to explore how you can embrace ADST's Know-Can-Do

ISTE's Standards for Students

7 Ways

WHAT WE ARE LEARNING: (OUR LEARNING INTENTIONS)

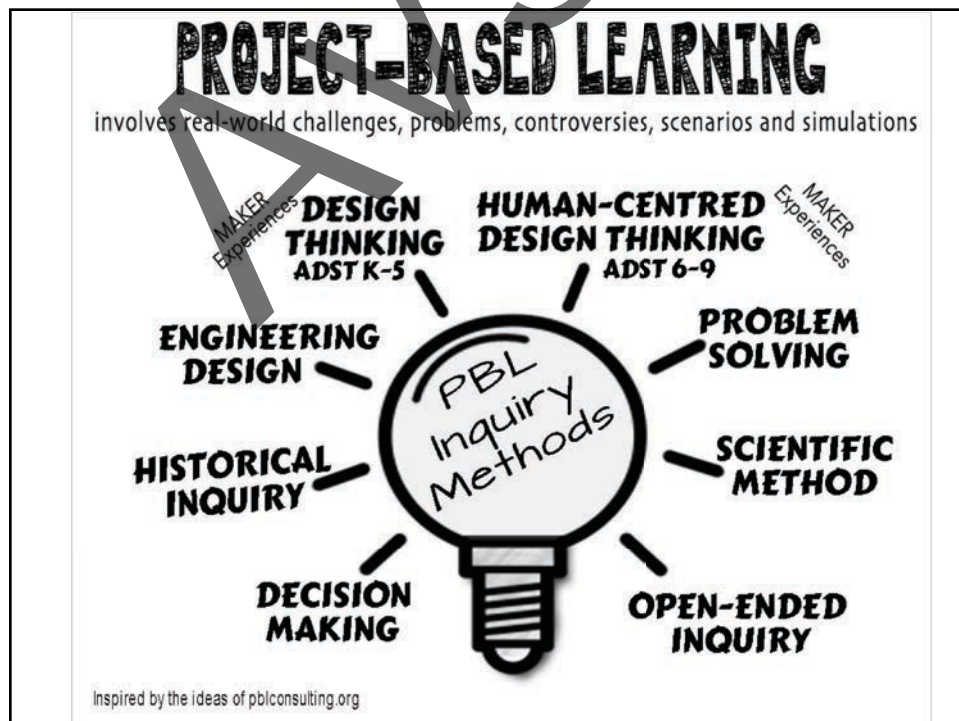

- ✓ Inspiration for the ADST curriculum
- 2. How the *Know, Can, Do* of the ADST curriculum evolves through the grade levels
- 3. *The elements of Design Thinking & how Maker could fit into ADST*
- 4. Important conditions for learning: *collaborative teams; brainstorming; and formative assessment*

Technology: Tools that can extend human capabilities

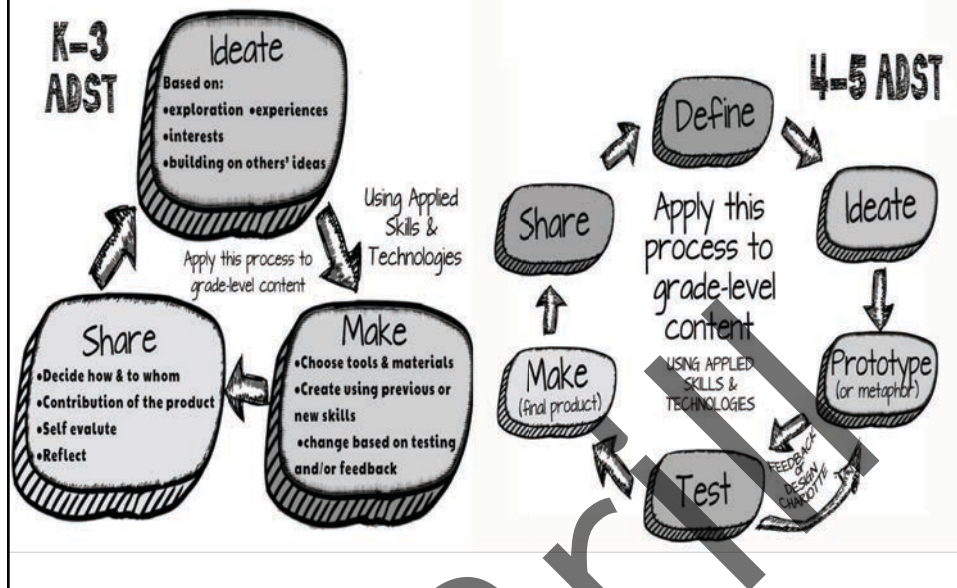

ADST BIG IDEAS					
	K-3	4-5	6-8	9-10	11-12
APPLIED DESIGN	Designs grow out of natural curiosity.	Designs can be improved with prototyping & testing.	Design can be responsive to identified needs.	Social, ethical, & sustainability considerations impact design.	Products can be designed for lifecycle.
APPLIED SKILLS	Skills can be developed through play.	Skills are developed through practice, effort, & action.	Complex tasks require the acquisition of additional skills.	Complex tasks require the sequencing of skills.	Personal design interests require the evaluation & refinement of skills.
APPLIED TECHNOLOGIES	Technologies are tools that extend human capabilities.	The choice of technology & tools depends on the task.	Complex tasks may require multiple tools and technologies.	Complex tasks require different technologies & tools at different stages.	Tools & technologies can be adapted for specific purposes.

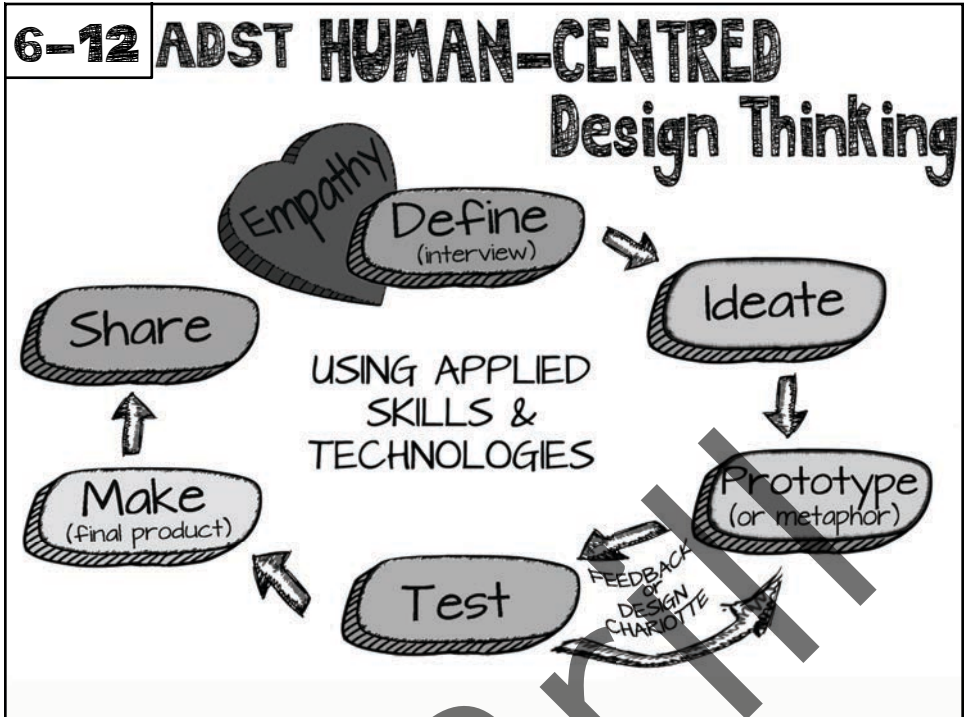

TRADITIONAL (DIRECTED) THINKING	DESIGN (EMERGENT) THINKING
Planning of a flawless intellect	Enlightened trial & error
Avoid failure	Fail fast
Right answers	Right questions
Rigorous analysis	Rigorous testing & feedback
Presentations and meetings	Experiments & experiences
Telling	Showing
Laboratory	In the field
Subject expert	Process expert
Thinking and planning	Doing
If you build it, they will use it	If they inspire & input on it, they'll use it

CURRICULAR COMPETENCIES

- "Create a musical instrument and use it to play a song."
- "Make a car that rolls exactly 20 feet and then stops."
- "Build the tallest structure you can from one sheet of newspaper."
- "Drop an egg from 3 meters without breaking it."

K-5 ADST CURRICULAR CONTENT

6-9 ADST CURRICULAR CONTENT

6-7	8	9
3 MODULES EACH YEAR	FULL YEAR COURSE OF 1+ MODULE	FULL YEAR COURSE OF 1+ MODULE
COMPUTATIONAL THINKING	COMPUTATIONAL THINKING	INFORMATION & COMMUNICATION TECHNOLOGIES
COMPUTERS & COMMUNICATION DEVICES	COMPUTERS & COMMUNICATION DEVICES	
DIGITAL LITERACY	DIGITAL LITERACY	
DRAFTING	DRAFTING	DRAFTING
ENTREPRENEURSHIP & MARKETING	ENTREPRENEURSHIP & MARKETING	ENTREPRENEURSHIP & MARKETING
FOOD STUDIES	FOOD STUDIES	FOOD STUDIES
MEDIA ARTS	MEDIA ARTS	MEDIA ARTS
METALWORK	METALWORK	METALWORK
POWER TECHNOLOGY	POWER TECHNOLOGY	POWER TECHNOLOGY
ROBOTICS	ROBOTICS	ELECTRONICS & ROBOTICS
TEXTILES	TEXTILES	TEXTILES
WOODWORK	WOODWORK	WOODWORK

Concern – that we will take a traditional approach to a non-traditional curriculum!

METALWORK	ELECTRONICS	DRAFTING
POWER TECHNOLOGY	ENGINEERING	ELECTRONICS
TECHNOLOGY EXPLORATIONS	METALWORK	ENGINE & DRIVETRAIN
WOODWORK	ROBOTICS	ENGINEERING
	WOODWORK	FURNITURE & CABINETRY
		INDUSTRIAL CODING & DESIGN
		MACHINING & WELDING
		MECHATRONICS
		METALWORK
		REMOTELY OPERATED VEHICLES AND DRONES
		ROBOTICS
		WOODWORK

WHAT WE ARE LEARNING:

(OUR LEARNING INTENTIONS)

Overview of ADST K-12

- ✓ Inspiration for the ADST curriculum
- ✓ How the Know, Can, Do of the ADST curriculum evolves through the grade levels
- 3. The elements of *Design Thinking* & how *Maker* could fit into ADST
- 4. Important *conditions for learning*:
collaborative teams; brainstorming;
and formative assessment

Design Thinking:

Substitutue something
Combine it with something
Adapt something to it
Modify or magnify it
Put it to some other use
Eliminate something
Reserve or rearrange it

Inventor

Idea of
dental floss

Inventor

Idea of
dental floss

Designer

Person/Team
who created the
dispenser

WHAT WE ARE LEARNING:

(OUR LEARNING INTENTIONS)

- ✓ Inspiration for the ADST curriculum
 - ✓ How the Know, Can, Do of the ADST curriculum evolves through the grade levels
3. The elements of Design Thinking & how Maker could fit into ADST
 4. Important conditions for learning: collaborative teams; brainstorming; and formative assessment

HUMAN-CENTRED Design Thinking

= focussing on
the present

partner's name (preceded by multiple adjectives)

needs a way to _____
(what he/she is trying to do)

Surprisingly // because // but...
(select one)

insight

Define

Share

Make (real product)

Test

Ideate

Prototype (or metaphor)

USING APPLIED SKILLS & TECHNOLOGIES
Apply this process to grade level AOST content modules

INTERVIEWING FOR UNDERSTANDING

- 1-2 team members ask the questions, listening for understanding
 - Aboriginal perspective of remembering: listen with 2 ears, 2 eyes, 1 brain, 1 heart
- 1 person records all the answers
 - Uncover the needs someone has
 - Never under estimate the power of why
 - Have the questions ready before hand
 - Build questions based on the answers

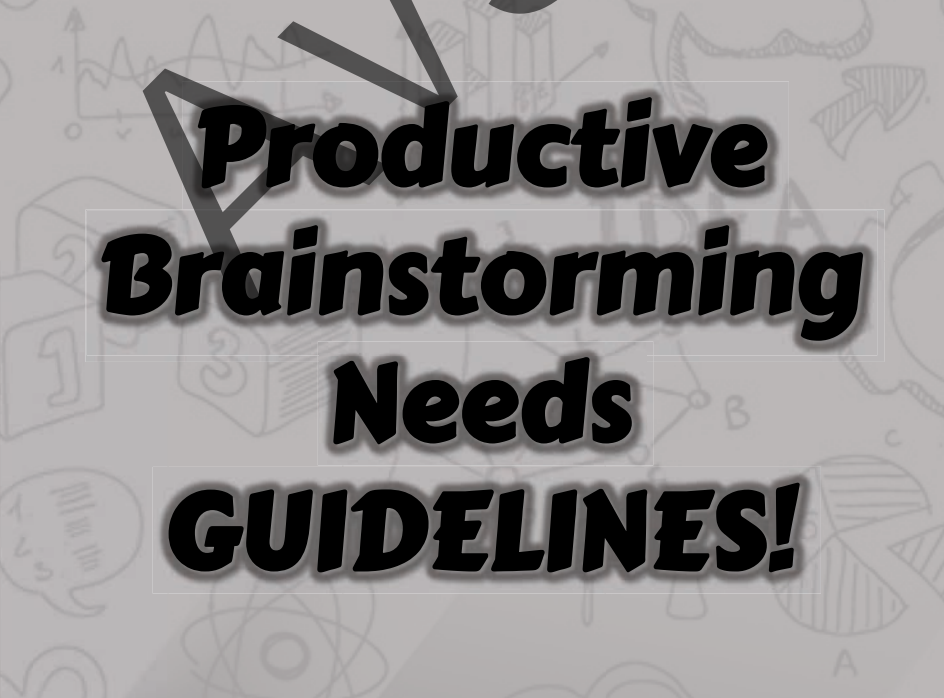

The diagram illustrates the design thinking process with the following steps in bubbles: Empathize, Define (interview), Ideate, Prototype (or metaphor), Test, Make (first product), and Share. A central text block reads: "USING APPLE SKILLS & TECHNOLOGIES Apply this process to grade level ADST content modules". A large, stylized word "BRAINSTORMING" is written diagonally across the top right. Below the diagram, a list of guidelines is provided, and a woman is shown in a thinking pose on the right side.

BRAINSTORMING

- Stand!
- This is not a LONG discussion
- Rapid ideas
- Upbeat music,
- different coloured pens

The background features a collage of various icons including a lightbulb, a gear, a magnifying glass, a speech bubble, a bar chart, a pie chart, and a line graph. Overlaid on this background is the title "Productive Brainstorming Needs GUIDELINES!" in a large, bold, black font with a white outline.

**Productive
Brainstorming
Needs
GUIDELINES!**

INDIVIDUAL BRAINSTORMING

5. Sketch 5 Ideas (10 mins.)

--	--	--	--	--

Ideate

MAKER THINKING

- Builds important fluency around Design Thinking helping to see designs in a different way
- A Constructivist approach
- A result of the DIY (Do It Yourself) and DIWO (Do It With Others) movements
- May involve *tinkering*, and *thinkering*
- Sessions may, or may not, involve:
 - all aspects of the design process
 - a multidisciplinary approach

Textiles

- range of uses of textiles

construction (e.g., sails at Canada Place),
 automotive, apparel, function (e.g., fire blanket),
 ceremonial (e.g., regalia)

Prototype

Textiles

- range of uses of textiles
- variety of textile materials

for example, leather, cedar, wool, cotton, felt, embroidery thread, yarn, grasses and reeds, pine needles, sinew, plastic, used items and fabrics (e.g., food wrappers, old clothing)

Prototype

Textiles

- range of uses of textiles
- variety of textile materials
- hand construction techniques for producing and/or repairing textile items

for example, hand sewing, knitting (needles, arm, spool), crocheting, weaving, darning, up-cycling (e.g., turning an underused item into something else), embellishing existing items

Prototype

Textiles

- range of uses of textiles
- variety of textile materials
- hand construction techniques for producing and/or repairing textile items
- consumer concerns that influence textile choices, including availability, cost, function (e.g., waterproof), and textile care

Prototype

FEEDBACK

FORMATIVE ASSESSMENT & TUNING

Formative Critique, Tuning & Assessment

WHACK-A-MOLE PROTOCOL

Place student work, along with criteria, critique instructions and/or questions for reflection, at student desks and/or stations. Students move around, as space is available, to provide critique for multiple pieces of work.

The idea is that they pop up when they finish each critique, like a mole in the "Whack-A-Mole" game. Then, they pop back down in a new space to conduct another critique, whenever one is available. This works well when the amount of time it will take to conduct critique will predictably vary.

CHARETTE PROTOCOL

This protocol was typically used in engineering. It is best used early on to feed-forward, rather than back. As soon as a process stalls, students can call a "charette" to get fresh perspectives and ideas on how to move their project forward.

PAIR CRITIQUE

Students are paired with a critique partner. Pairs respond directly to critique and feedback questions generated by the teachers, the class and/or by the work author or designer.

EXIT SLIPS

Prepared in advance by the teacher or done on-the-fly, exit slips can act as a tool for understanding and/or collecting information on work completion, effectiveness of instruction, process, materials, and more.

2 STARS & A WISH

Students can acknowledge and share 2 things that were done well. Then they share a wish they have that will enhance the work being examined.

WHAT WE ARE LEARNING:

(OUR LEARNING INTENTIONS)

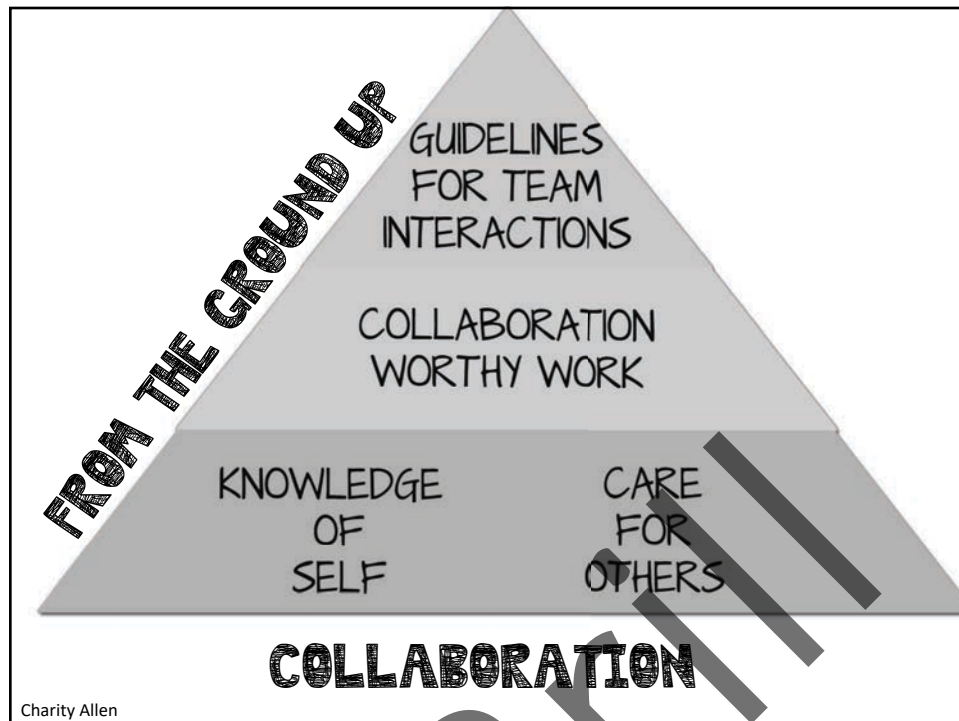

- ✓ Inspiration for the ADST curriculum
 - ✓ How the Know, Can, Do of the ADST curriculum evolves through the grade levels
 - ✓ The elements of Design Thinking & how Maker could fit into ADST
4. Important conditions for learning: collaborative teams; brainstorming; and formative assessment

Collaborative Teams

CAUTION

**“Students are working in teams during
this project, so that’s collaboration”**

Simplified Compass

- 1. North: (Doing) “Let’s get going”**
 - > Likes to see things get done.
 - > Plunge in and figure it out as you go.
- 2. South: (Caring) “Let’s get everyone involved”**
 - > Likes to know that everyone’s ideas have been taken into account and that all opinions are heard before acting.
 - > Cares about the feelings / collaboration of the group.
- 3. East: (Speculating) “I want to see the whole picture”**
 - > Likes to look at the big picture and all the possibilities before taking action.
 - > Takes time to process before speaking
- 4. West: (Details) “I need to know the details”**
 - > Likes to know the who, what, when, where, and why before acting
 - > Details are very important

Common Team Roles

<p>TEAM LEADER</p> <ul style="list-style-type: none"> Establishes and runs team meetings Sets and monitors goals & agreements and redirects team, as needed Delegates tasks and divides work, as needed Mediates conflict between team members Encourager <p><i>Key Trait:</i> Relationship-oriented</p>	<p>RESEARCH LEAD</p> <ul style="list-style-type: none"> Goes outside of provided materials to gather and share useful information. Focuses on "supporting on the sidelines" Helps team overcome obstacles and roadblocks. Collects, maintains and uses the Team Need to Know List to drive work <p><i>Key Trait:</i> Resourceful</p>	<p>ORGANIZATIONAL LEAD</p> <ul style="list-style-type: none"> Keeps time during activities and phases of design Maintains a schedules and tracks progress toward goals and milestones Keeps track of materials Organizes and maintains team documents <p><i>Key Trait:</i> Detail-oriented</p>
<p>DESIGN LEAD</p> <ul style="list-style-type: none"> Directs team to use the design process. Tracks team's use of each phase of design Gathers team perspectives, makes key design decisions <p><i>Key Trait:</i> Process-oriented</p>	<p>ARCHIVIST</p> <ul style="list-style-type: none"> Archives team's work in progress, drafts and prototypes Takes photos and videos of work in progress Captures quotes, moments & process <p><i>Key Trait:</i> Reflective</p>	<p>CURATOR</p> <ul style="list-style-type: none"> Focuses on how work will be displayed at the end Pays attention to detail without losing sight of the big picture Collaborates with other curators to ensure continuity of work curating at the end Consults with team on during project <p><i>Key Trait:</i> Visionary</p>

BEING A TEAM MEMBER

TALKING AS A TEAM

When we speak to each other, we...

When we make decisions, we...

Also, we...

When we don't agree, we...

If someone misses something, we will...

We will meet on...

Project/Communication Plan				Langley Schools	
Project Name					
Team Members					
Objective: •			Date of Completion: •		
TEAM COMMUNICATION					
How will we conduct team meetings? How often?					
What are our norms for discussion and communication?					
How will we collaborate when we are not meeting in person?					
How will we make decisions? How will we resolve conflict?					
Resources Required:		• •			
TIMELINE COMPLETION					
What needs to be done?	Who will do this part?	By when?	Done:		

Blank area for additional notes or details.

With a shoulder partner, discuss in reference to the work you do:

1. How you build collaborative teams when working with teachers? With students?
2. What tools you use when building collaborative teams?

One person from each shoulder partner capture the discussion in Teams:

1. Staff Meeting Discussions Channel Conversations
2. Responding to the appropriate thread starter by Sandra
